Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from The Elements of Descriptive Geometry Descriptive Geometry contains the rudiments of Mechanical Drawing, Shades and Shadows, Perspective, and Advanced Technical Drawing. Drawing is a language by means of which we can inform one another of the shape and size of different objects. In teaching a child to read, we do not, at first, give him a book of Shakespeare, but start him with the alphabet and words of one syllable. Consequently, the author has endeavored to build up the subject step by step, inserting the necessary definitions only as needed, rather than by starting the student with innumerable definitions, which, at the time, mean little or nothing to him. In the drawings, too, the author has employed the synthetical method by first presenting a drawing of the given lines, then a drawing illustrating the next step in combination with the preceding one, and so on by a series of drawings, completing the example with the finished drawing. Intersections, developments, etc., are usually included in the regular course in Mechanical Drawing. It seems needless, therefore, to include them in this elementary text. If it is desirable to include more advanced work in the course of Descriptive Geometry, this book will form such a foundation that the student may readily interpret any higher treatise. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work.
